Méta-classifieur

```
graph TD; M1[Modèle 1] --> MC[Méta-classifieur]; M2[Modèle 2] --> MC; M3[Modèle 3] --> MC;
```

The diagram illustrates a meta-classification architecture. At the top, three light blue rounded rectangular boxes are arranged horizontally, labeled 'Modèle 1', 'Modèle 2', and 'Modèle 3'. From the bottom of 'Modèle 1', a black line descends and then turns right to point at the top of the 'Méta-classifieur' box. From the bottom of 'Modèle 2', a black line descends straight to point at the top of the 'Méta-classifieur' box. From the bottom of 'Modèle 3', a black line descends and then turns left to point at the top of the 'Méta-classifieur' box. The 'Méta-classifieur' box is a light green rounded rectangle centered below the other three.
